

KWS Fido

WINTER TRITICALE

AHDB
DESCRIBED

KWS Fido is a widely grown high yielding triticale variety with taller, but stiff straw. KWS Fido is early to ripen and has a superb specific weight. The excellent performance and superb agronomics make KWS Fido the perfect choice for the second cereal slot on farm.

• Popular UK variety

• Stiff, taller straw

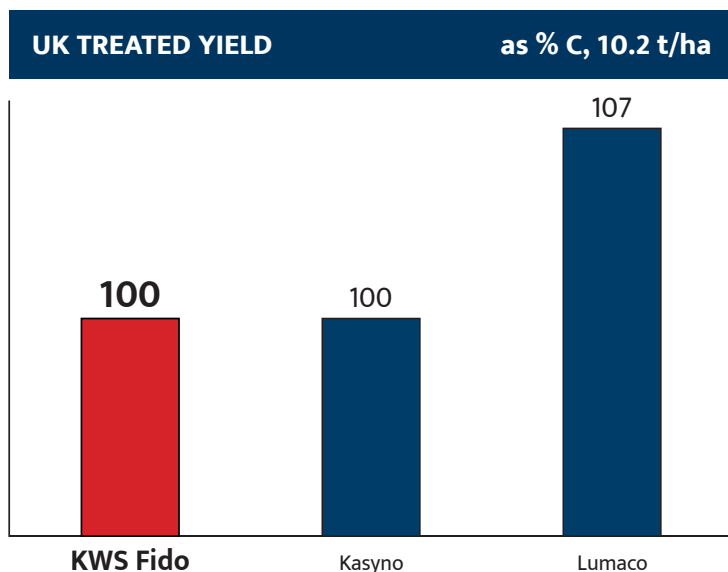

• Early to ripen

• Excellent specific weight

The performance of triticale in a second cereal situation has for many years been underestimated. Interest is now increasing on farm in this flexible, high yielding crop. Second cereal yields on farm can compare favourably with other crops, including wheat.

A principle market for triticale is for grain and for on farm feeding. There is an expanding market in anaerobic digestion, where triticale's low costs, ease of management and dry matter yields are attractive. Senova's leading varieties are proving popular for AD plants.

Triticale is also well suited for bioethanol production, with its inherently high fermentable carbohydrates and soluble proteins. In addition, triticale is very productive in NVZs and under lower input systems.

GRAIN QUALITY

Specific weight (kg/hl)	73.1
Protein content %	10.0

AGRONOMICS

Lodging %	[0]
Straw length (cm)	116
Ripening (days ± KWS Fido)	0

DISEASE RESISTANCE

Yellow rust	5
