KWS FOWLMERE

Hard Group 4 Winter Wheat
(KWS Extase x W340)

- Earliest maturing variety on the Recommended List (-2)
- Very high specific weight (79.8kg/hl)
- OWBM resistance

KWS Fowlmere, a home-grown wheat from our breeding field trials in Fowlmere! A hard Group 4 winter wheat. KWS Fowlmere has had consistent high yields over the past 4 years. It is an excellent barn filling choice with outstanding grain quality including one of the highest specific weights on the market.

With a -2 for maturity, this gives farmers a lot more flexibility on farm, being able to schedule harvest pressures to ensure a safe harvest. KWS Fowlmere also has a good untreated yield (88%). KWS Fowlmere has a solid disease package with scores of [7] for Fusarium, 6.1 for *Septoria*, 5 for Mildew and

OWBM resistance, making this variety a good option for any farmer wanting a good all round barn filler.

KWS Fowlmere also has fantastic grain quality for a hard group 4 wheat with an 79.8kg/hl specific weight, so for those that like KWS Dawsum but wanting more yield and OWBM, KWS Fowlmere is a fantastic option.

What makes KWS FOWLMERE the wheat variety for you?

Exceptionally early maturity for a safe, secure harvest.

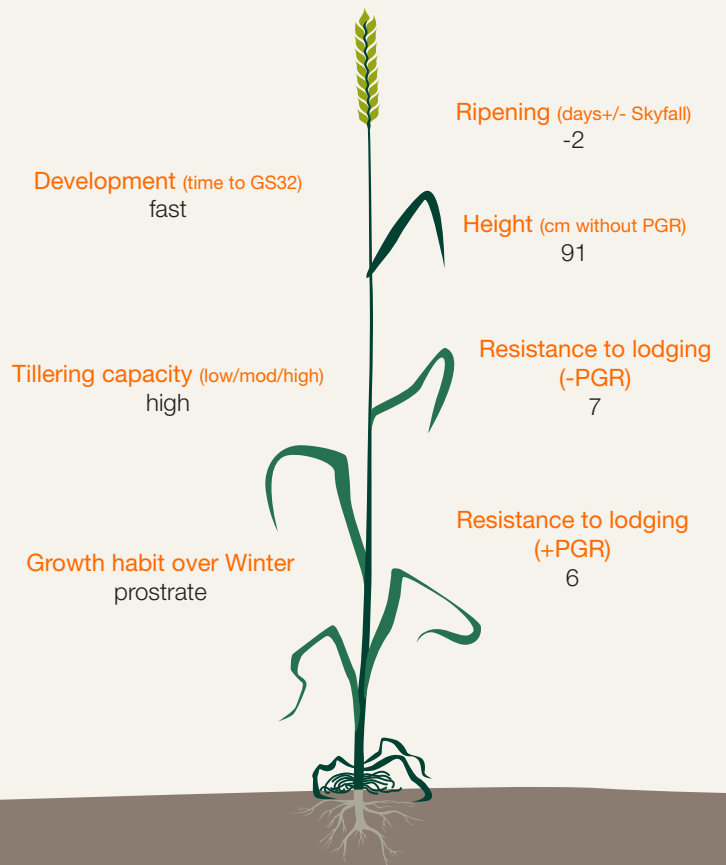

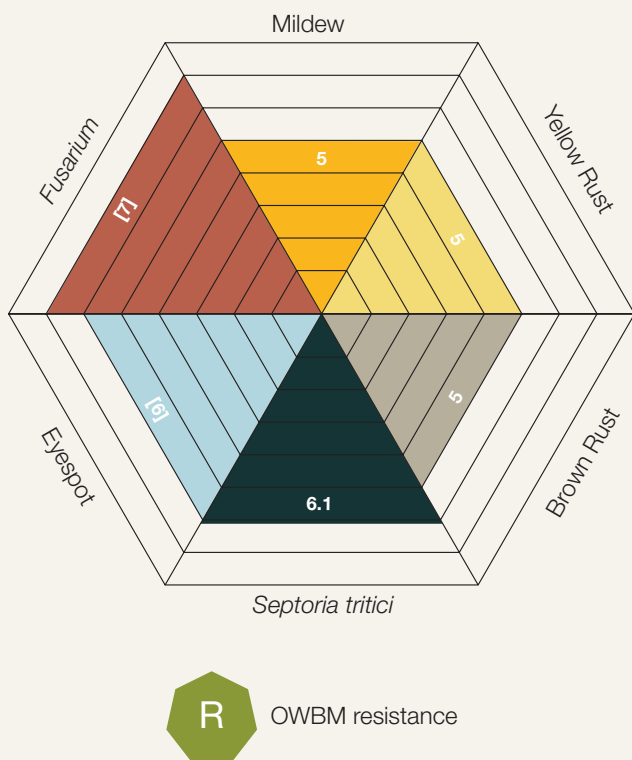

KWS FOWLMERE yield performance

KWS Fowlmere is a high yielder at over 106% which outyields all of the varieties which were listed on the 2025/26 RL.

Disease resistance and agronomy of KWS FOWLMERE

KWS FOWLMERE end markets

KWS Fowlmere is a classic UKFM Group 4 barn filler, meeting and exceeding the intake requirements of the animal feed sector. In addition, thanks to its outstanding specific weight, KWS Fowlmere may also find favour in the flour milling industry; always check with your local home. KWS Fowlmere also has UKP for export, giving growers further marketing flexibility.

KWS FOWLMERE - Sowing for Peak Performance

80% of your crop's potential is locked in by the seed you buy and sow. While you can fine tune this with the correct nitrogen levels, using fungicides wisely to protect it from disease and paying attention to basic management principles, many attributes of your crop can't be changed. Therefore, it pays for you and your agronomist to make proactive choices before ordering a variety.

To get peak performance from KWS Fowlmere we recommend drilling in the following time window:

At KWS, we believe to get the best performance on your farm it is critical that when you choose your variety, you are using a wealth of data to tailor your choice for both your farm and individual field situation.
