HIGH YIELDS ARE IN SIGHT.

SEEDING THE FUTURE SINCE 1856

KWS

KWS SCOPE

Group 4 Winter Wheat
(Informer x KWS Kinetic)

- High yielding, Hard Group 4 feed wheat
- New genetics for UK growers
- Ideal wheat for growers who like short and stiff types like Graham

KWS Scope brings new genetics to UK growers; the cross has German-bred wheat Informer as one of its parents. Informer was a very successful European wheat which was tall but clean and had bread-making potential. KWS Scope is a shorter, earlier Graham type wheat that is in trial in the UK and across Germany and Scandinavia.

In terms of yield potential, KWS Scope has delivered excellent yields, especially in 2023 & 2024 when It was one of the highest yielding wheat lines in NL2 trials (107% controls) in 2023 & 111% in 2024.

Last year, it entered the Recommended List as the highest yielding winter wheat. It performs particularly well in the AHDB West region (107%).

A medium-high tillering variety, KWS Scope is a short (90cm without PGR) and stiff variety which has the same maturity to its predecessor. It has a 6.6 rating for *Septoria* and comes with the benefits of OWBM resistance.

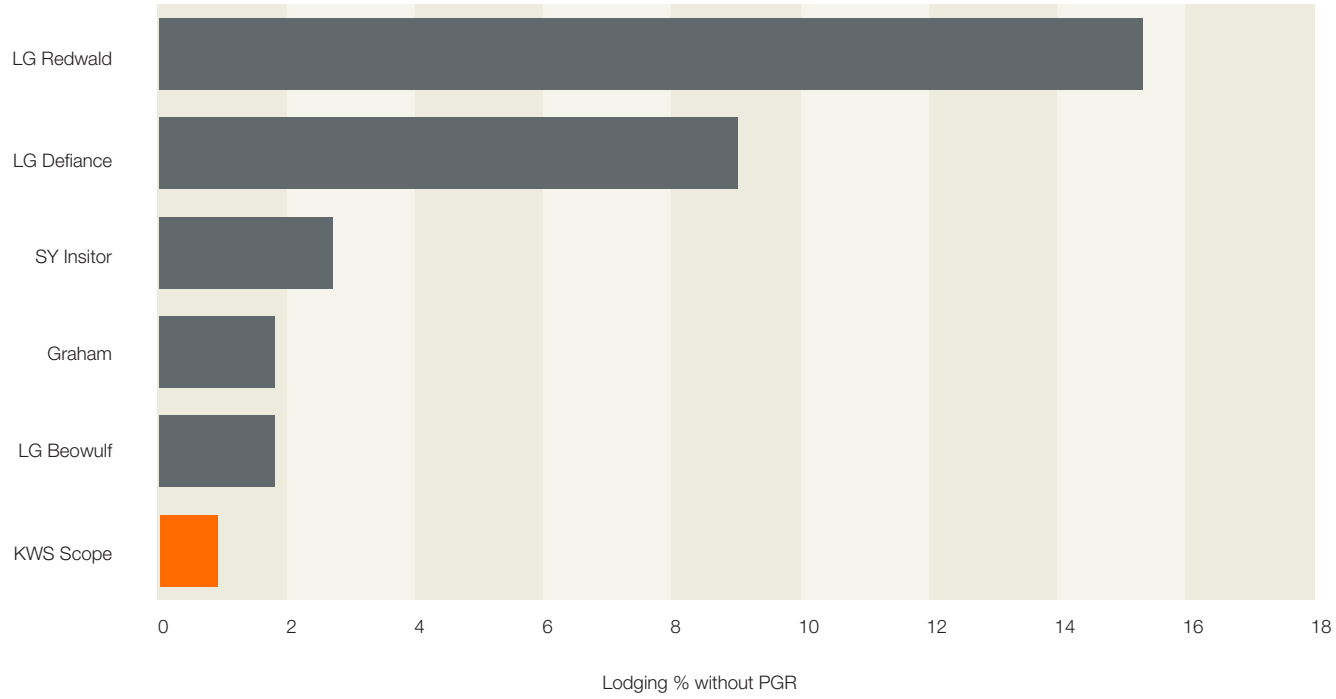
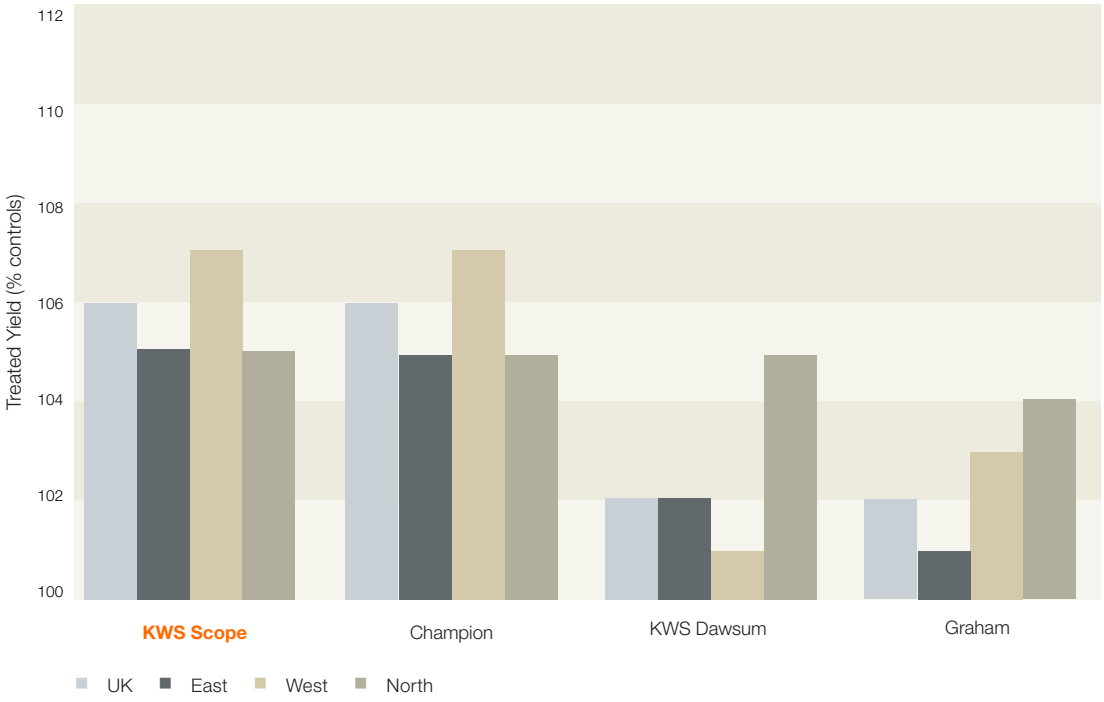
What makes KWS SCOPE the wheat variety for you?

KWS has all the characteristics growers need for a safe and secure harvest.

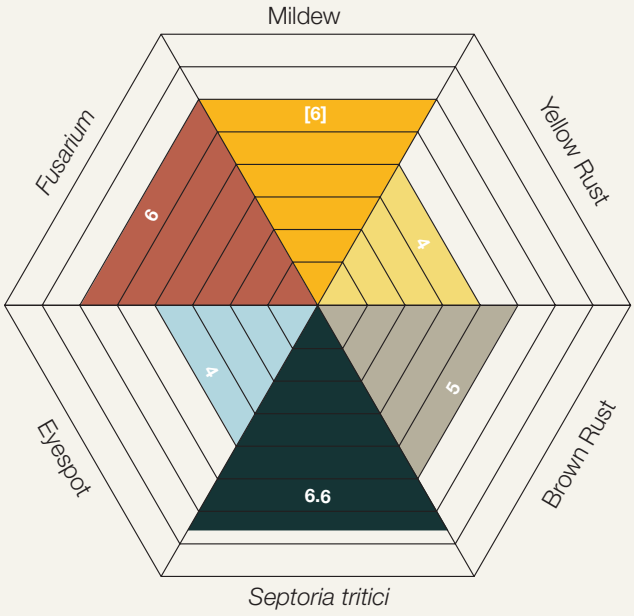


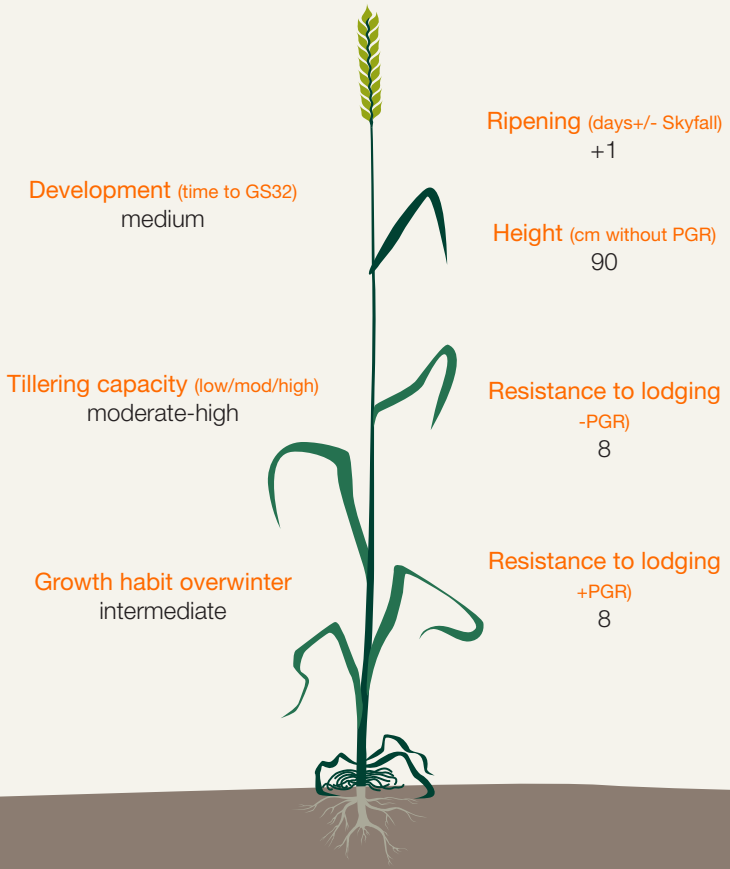
KWS SCOPE yield performance



Yield	% treated controls
UK	106
East	105
West	107
North	105
Untreated	84
2022	105
2023	107
2024	108
2025	104

Disease resistance and agronomy of KWS SCOPE





KWS SCOPE end markets

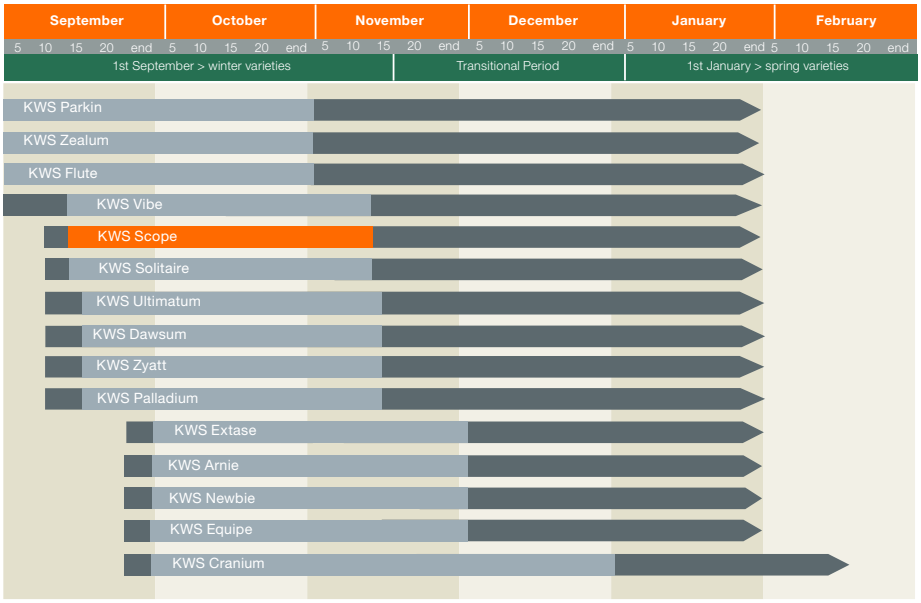
KWS Scope is a classic hard feed barn filler and exceeds the intake requirements of the animal feed sector.

	KWS Scope
Grain Quality	
Protein content (%) - Milling spec	11.8
Hagberg Falling Number	251
Specific Weight (kg/hl)	78.6

KWS SCOPE - Sowing for Peak Performance

80% of your crop's potential is locked in by the seed you buy and sow. While you can fine tune this with the correct nitrogen levels, using fungicides wisely to protect it from disease and paying attention to basic management principles, many attributes of your crop can't be changed. Therefore, it pays for you and your agronomist to make proactive choices before ordering a variety.

To get peak performance from KWS Scope we recommend drilling in the following time window:



At KWS, we believe to get the best performance on your farm it is critical that when you choose your variety, you are using a wealth of data to tailor your choice for both your farm and individual field situation.
